Summary

Junior **Frontend Developer** with 13 years of experience as a Shift Leader Engineer in the cement industry, bringing strong **problem-solving**, **leadership**, and **attention to detail**. Passionate about technology, I have been learning programming for over 3 years, starting with **C** and **C++**, and currently building modern web applications using **HTML**, **CSS**, **JavaScript**, **TypeScript**, **Tailwind CSS**, and **React.js**. I also have experience integrating and applying **LLM services** via APIs within web applications. Eager to contribute to impactful projects, collaborate with teams, and grow as a frontend developer.

Experience

- Arab Swiss Engineering Company (ASEC)** 2012 – Present
Shift Leader Engineer Jordan / Egypt (Remote Sites)
- Promoted from **Junior Kiln Operator (2012)** to **Senior Kiln Operator**, **CCR Engineer**, and later **Shift Leader Engineer (2018)**, demonstrating strong **leadership** and **technical expertise** in the cement industry.
 - Supervise **production processes**, manage **resources**, and ensure **safety and efficiency** across multiple locations in **Egypt** (North Sinai, Qena, Minya, Assiut) and **Jordan (since 2015)**.
 - Optimize operations by **troubleshooting complex issues**, improving **workflows**, and fostering **team collaboration** to meet performance targets.
 - Contribute to **international projects**, adapting to diverse operational environments while maintaining a focus on **quality**, **safety**, and **continuous improvement**.
- Freelance Front-End Developer** 2023 – Present
Khamsat, Mostaq, Upwork Remote
- Delivered over **20+ professional web projects** for clients across the Middle East, including e-commerce platforms, admin dashboards, AI-powered applications, landing pages, and custom business systems.
 - Designed and developed high-quality **React.js**, **Next.js**, and **Tailwind CSS** front-end solutions with a focus on performance, accessibility, and responsive UI/UX.
 - Built **full-stack applications** integrating Firebase, Node.js/Express APIs, and third-party services such as PayPal, OpenAI API, and Google APIs.
 - Collaborated closely with clients to understand business needs, provide technical guidance, and deliver scalable, maintainable solutions on time.
 - Maintained strong client relationships, achieving consistent **5-star feedback** on freelance platforms by delivering reliable support, revisions, and long-term maintenance.

Projects

- Go Umrah – Travel Booking Application** | *React.js, Node.js, Firebase* [🔗 Demo](#) – [📁 Repo](#)
- Developed a full-stack **travel booking platform** with authentication, booking management, and secure payment integration.
 - Built a responsive **admin dashboard** with dynamic form generation for flexible content management.
 - Integrated third-party APIs for real-time data handling and booking services.
 - Deployed a production-ready application with performance optimizations and mobile-first design.
- Marwan Educational Platform – E-Learning System** | *React.ts, Firebase, Tailwind CSS, OpenAI API* [🔗 Demo](#) – [📁 Repo](#)
- Built a full-stack **educational platform** featuring role-based dashboards for administrators and students.
 - Developed a comprehensive **exam management system** supporting custom assessments, manual grading, and per-question feedback.
 - Integrated the **OpenAI API** to create an intelligent math tutor assistant that provides step-by-step problem-solving guidance.
 - Implemented secure video streaming via **Cloudinary** and managed document distribution using **Firebase Storage**.
- Corporate Cement Portfolio** | *Next.js, React, Tailwind CSS, Framer Motion* [🔗 Demo](#) – [📁 Repo](#)
- Developed a modern, responsive **corporate portfolio** website for a cement manufacturing business using Next.js and React.

- Implemented dynamic and interactive UI components with **Framer Motion** and styled the application seamlessly using **Tailwind CSS**.
- Engineered an optimized, high-performance web experience with fast load times and a **mobile-first design** approach.
- Designed structured, reusable components to ensure maintainability and easy future content updates.

Fake Radar – Deepfake Detection Platform | *Next.js, React, Tailwind CSS*

[🔗 Demo](#) — [🔗 Repo](#)

- Developed an Arabic RTL **deepfake detection web application** using Next.js App Router for processing image and video media.
- Engineered a robust **multi-provider API fallback chain** integrating RealityDefender, BitMind, and Sightengine with automatic quota and error handling.
- Implemented server-side media processing, including custom URL resolution, secure byte downloading, and video frame extraction using ffmpeg.
- Designed a modern UI with **Tailwind CSS** and Framer Motion, featuring custom animations to enhance the user experience during analysis.

Kashif Ash3a | *React.js, Vite, Tailwind CSS, Firebase*

[🔗 Demo](#) — [🔗 Repo](#)

- Developed a fast and responsive **single-page web application** utilizing React and Vite for optimized performance.
- Built dynamic user interfaces and fluid animations using **Tailwind CSS** and **Framer Motion** to enhance the user experience.
- Integrated a **Firebase backend** to seamlessly manage user authentication, real-time database operations, and cloud functions.
- Designed an **administrative workflow** system with custom scripts for role-based access control and secure data management.

Car Marketplace Web Application | *React.js, Firebase, Tailwind CSS*

[🔗 Demo](#) — [🔗 Repo](#)

- Built a full-stack **car marketplace** tailored for the Saudi Arabian market.
- Implemented real-time listings, advanced filtering, and **Firebase-based authentication**.
- Designed a modern, responsive UI with **Framer Motion** animations.
- Deployed on Vercel using a modern CI/CD workflow.

Autonique – Cybersecurity Solutions Website | *React.js, Firebase, Tailwind CSS*

[🔗 Demo](#) — [🔗 Repo](#)

- Developed a cybersecurity-focused web platform using React and Firebase Firestore.
- Built a real-time **admin dashboard** with dynamic content management capabilities.
- Implemented responsive **Arabic RTL** design with Framer Motion animations.
- Delivered an optimized production build with integrated testing workflows.

FinWise – AI-Powered Financial Planning Platform | *React.js, Node.js, Tailwind CSS*

[🔗 Demo](#) — [🔗 Repo](#)

- Developed an AI-driven platform for personalized financial planning and budgeting.
- Built a multi-step budget calculator using **React Context API** and form validation.
- Designed a responsive **Arabic RTL** interface using Tailwind CSS and Framer Motion.
- Integrated OpenAI API through an Express.js proxy for intelligent recommendations.

Learning Difficulties Diagnostic Testing Platform | *React.js, Vite, Tailwind CSS*

[🔗 Demo](#) — [🔗 Repo](#)

- Built an educational diagnostic testing platform with multiple interactive assessment types.
- Implemented reading comprehension, MCQs, and text-based tests with real-time validation.
- Designed a fully responsive **Arabic RTL** interface using Tailwind CSS.
- Added dynamic question rendering with progress tracking and smooth navigation.

E-commerce Website | *React.js, Firebase, Tailwind CSS, PayPal*

[🔗 Demo](#) — [🔗 Repo](#)

- Developed a production-ready **e-commerce platform** with Arabic and English support.
- Implemented Firebase authentication with email/password and Google login.
- Managed cart and favorites using **React Context API**.
- Integrated secure PayPal payment processing and mobile-first UI design.

Notes App | *React.js, Tailwind CSS*

[🔗 Demo](#) — [🔗 Repo](#)

- Built a responsive note-taking application with a clean, minimal UI.
- Implemented full CRUD functionality with React Router navigation.
- Used React hooks for efficient state management and smooth user experience.

Education

Port Said University <i>Bachelor's Degree in Chemical Engineering</i>	Egypt
American University in Cairo (AUC) <i>Diploma in Cement Production (Cement Industry Diploma)</i>	Egypt
ASEC (Arab Swiss Engineering Company) <i>Diploma in Cement Manufacture (ACMC: ASEC Cement Manufacture Course)</i>	Egypt
ALMADRASA Academy <i>Diploma in Frontend Development</i>	Online
GAMMAL TECH Academy <i>Programming Fundamentals Certificate</i>	Online

Technical Skills

Languages: HTML5, CSS3, SASS, JavaScript (ES6+), TypeScript, Python
Frameworks & Libraries: React.js, Next.js, Tailwind CSS, Framer Motion
Backend & Services: Firebase, Node.js, Express.js, REST APIs
AI & Automation: LLM API Integration (OpenAI), Prompt Engineering
Tools & Platforms: Git, GitHub, Vercel, Netlify
